

9/11:

Blueprint for Truth

The Architecture of Destruction

with Architect Richard Gage, AIA

Saturday, March 22, 7pm
McCurdy Park (at the Museum
of History and Industry (MOHAI))
2700 24th Ave East
Seattle, Washington

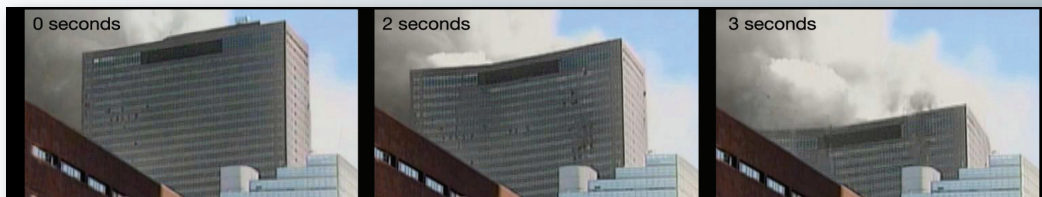

Did you know that:

- 118 first responders witnessed explosions and flashes?
- Tons of molten iron was "flowing like lava" under the buildings?
- Thermite, an incendiary used to cut steel, was found in the WTC beams and in the WTC dust?
- **3** buildings were destroyed on 9/11, including Building 7, a 47-story skyscraper that fell at nearly free fall speed into its own footprint?

Richard Gage, AIA, is a 20-year architect who has performed extensive research into the collapses of all 3 World Trade Center buildings. What he has to present in a live multi-media presentation is shocking and timely. Come see for yourself, ask questions and ***demand answers!***

WTC Building 7
